Dear Author!

Since 2015 the journal *Annals of the Russian academy of medical sciences* implements international practice of electronic editorial. Authors can submit their manuscripts **ONLY THROUGH THE JOURNAL SUBMISSION SITE**.

Official website of the journal: [http://vestnikramn.spr-journal.ru/jour](http://vestnikramn.spr-journal.ru/jour)

To submit a paper you should follow the instructions:

1) **REGISTER** on the site (you should indicate your ORCID ID).

2) Follow the link «Submit a manuscript» (on every page in the upper right corner).
3) In the field «SECTION» select the **APPROPRIATE SECTION TYPE** for your submission.

4) **SELECT the PRIMARY LANGUAGE** for the full-text article.
5) Please, **STUDY THE TERMS** of the publication charge (article processing charge).

6) Please, **CONFIRM THE COMPLIANCE** of your manuscript to the journal requirements.

7) **CONFIRM ASSIGNMENT OF COPYRIGHT** in accordance with the mentioned terms.
8) **NOTIFY THE EDITOR** of all the details requiring attention:

- some part of a manuscript doesn’t meet the journal requirements (justify this discrepancy);
- a part or the full-text of the paper was submitted to another journal previously (but wasn’t published and is not reviewed at the moment!);
- author has some additional material to the manuscript which can be published online etc.

9) Go to the second step in the manuscript submission process and **UPLOAD the FILES of the MANUSCRIPT**.

Please, pay attention that you should follow the author’s guidelines while preparing the manuscript. For more detailed information visit: [http://vestnikramn.spr-journal.ru/jour/about/submissions#authorGuidelines](http://vestnikramn.spr-journal.ru/jour/about/submissions#authorGuidelines).
10) Proceed to the third step and FILL THE METADATA. You should fill in all the fields (possible) with as much detail as possible. This information will be used when indexing an article in Russian and international databases. It is obligatory to indicate all the authors. Put the names in the correct sequence – the order names will be published in the article.

11) To populate the metadata in another language, you need to go back to the beginning of the form, select the language you want in the field "Form Language" (when you switch the already filled data is stored) and fill in the form. After that action, the form is ready to save.

12) Proceed to the next step and UPLOAD SUPPLEMENTARY FILES (enclosures, high-resolution images, additional content).
13) On the next step **CHECK the LIST of the DOCUMENTS** you send to the editor and then pay for the article processing charge.

14) **PERFORM the PAYMENT** the way you choose and receive the notification by e-mail that the manuscript was submitted successfully (to be sure check the spam folder).
You can interrupt the process of submission at any stage and then continue it at a convenient time logging into personal account on the website. All the entered information will remain.

NB!! In case of improper preparation of the manuscript or indication of incorrect or incomplete data on the website, the editors will require authors to make the appropriate changes and, in the absence of such, refuse further consideration of the manuscript.

Sincerely yours,
Editorial office of the journal «Annals of the Russian academy of medical sciences»
